

EDUCATION

Boston University

Ph.D. candidate in Computer Science
- Advisor: Professor Brian Kulis

Boston, MA
2016 – 2020 (expected)

University of California, Berkeley

- Visiting *Ph.D.* student supervised by Professor Trevor Darrell

Berkeley, CA
2019 – Present

Harvard University

M.E. in Computational Science and Engineering

Cambridge, MA
2014 – 2016

Brown University

M.S. in Electrical Science

Providence, RI
2012 – 2013

Beijing Institute of Technology

B.S. in Electrical and Information Engineering

Beijing, China
2008 – 2012

RESEARCH INTERESTS

- **Transfer Learning:** image/video style transfer, domain adaptation, and segmentation.
- **Embedding Models:** fast fashion retrieval, deep metric learning for ranking, and attribute-based models.

RESEARCH & INDUSTRY EXPERIENCE

• Berkeley AI Research (BAIR), UC Berkeley

Visiting *Ph.D.* student supervised by Professor Trevor Darrell

Berkeley, CA
Sept 2019 – Present

- Develop an end-to-end model for zero-shot real-time video style transfer.

• Google AI Research

Student Researcher

Mountain View, CA
Sept 2019 – Present

- Generalize the style transfer model to arbitrary styles.
- Extend the image photorealistic style transfer model to video datasets.
- Results will be submitted as a conference paper to CVPR 2020.

Research Intern

May 2019 – Aug 2019

- Developed an end-to-end model for image enhancement and photorealistic image style transfer.
- Graphic/layout design stylization.

• BU Image and Video Computing (IVC) Lab

Research Assistant

Boston, MA
Sept 2016 – May 2019

- Attribute-based deep metric learning for fashion retrieval.
- Fully-unsupervised image segmentation and learning the underlying lower-dimensional representation for images.
- Multi-domain transfer learning and adaptation.
- Results are published/submitted as conference papers at CVPR, ICCV, WACV and AAAI.

• Google

SWE-PhD Intern

Mountain View, CA
May 2018 – Aug 2018

- Designed and implement a deep attribute-based embedding model for traffic sign data.
- Improved the F1 score by around 18% on unseen data.

• Legendary Applied Analytics

Research Intern

Boston, MA
Sept 2017 – May 2018

- Developed and implement a deep Convolutional Neural Network for spatial-temporal representation learning.
- Developed a model to predict viewer counts and like/dislike ratio prediction for trailer movies.

• Harvard University

Research Assistant

Cambridge, MA

Feb 2015 – June 2016

- Designed and implemented a Recurrent Neural Network (RNN) model for intervention and outcome predictions in ICU
- Simulated multidimensional physiological time series of patients during vasopressor administration.
- *M.E. Thesis: Cost-Sensitive Batch Mode Active learning and Its Application to Astronomy.*
- Results are published as a conference paper at SDM 2016.

• Harvard Medical School

Research Fellow in the Laboratory of Systems Pharmacology (LSP)

Boston, MA

Aug 2013 – June 2016

- Developed a new computational method for predicting protein-DNA interactions based on sequences information.
- Developed a Protein-DNA Structure-Affinity Database (PDSA) in which the experimental and quantitative DNA binding affinities of helix-turn-helix proteins were mapped onto the crystal structures of the corresponding protein-DNA complexes.
- Results are published as a journal paper at BMC Bioinformatics.

HONORS & AWARDS

[A.7] Research Fellowship (2016-Present, Boston University, Boston, MA)

[A.6] CRA-Women Graduate Cohort Workshop Student Travel Award 2017

[A.5] Dean's Fellow Scholarship - awarded to two students each year (2016-2017, Boston University, Boston, MA)

[A.4] Harvard IACS Scholarship - awarded to one student each year (2015-2016, Harvard University, Cambridge, MA)

[A.3] SDM Student Travel Award 2016

[A.2] Research Fellowship (2013-2016, Harvard Medical School, Cambridge, MA)

[A.1] Ren-Min Scholarship (2008-2012, Beijing Institute of Technology, Beijing, China)

TEACHING EXPERIENCE

- | | |
|---|-------------|
| • CS585 Image and Video Computing, Boston University | Spring 2020 |
| • CS591 Deep Learning, Boston University | Fall 2018 |
| • CS131 Combinatoric Structures, Boston University | Fall 2016 |
| • AM207 Stochastic Methods for Data Analysis, Inference, and Optimization, Harvard University | Spring 2016 |

PROFESSIONAL SERVICES

Reviewer of CVPR, ICCV, ECCV, AAAI, ACMMM, WACV, SDM, and BMVC.

TECHNICAL STRENGTHS

- **Programming Languages:** Python, C/C++, Java, Matlab, and R.
- **Deep Learning Libraries:** Tensorflow, PyTorch, MatConvNet, Keras, and Caffe.
