EDUCATION

Boston University <i>Ph.D.</i> candidate in Computer Science Advisor: Professor Brian Kulis	2016 – Present Boston, MA
Harvard University , Institute for Applied Computational Science <i>M.E.</i> in Computational Science and Engineering	2014 – 2016 Cambridge, MA
Brown University , School of Engineering <i>M.S.</i> in Electrical Engineering	2012 – 2013 Providence, RI
Beijing Institute of Technology , College of Information and Electronics <i>B.S.</i> in Electrical and Information Engineering	2008 – 2012 Beijing, China

RESEARCH INTERESTS

Deep Learning, Computer Vision, Metric Learning, Transfer Learning, and Image Segmentation.

PROFESSIONAL EXPERIENCE

Google Research , Mountain View, CA Research Intern at Google Research • Image enhancement and style transfer learning.	Upcoming Summer 2019
Boston University , Boston, MA Research Assistant in Image and Video Computing (IVC) Lab • Deep metric learning for image retrieval via list-wise ranking loss. • Multi-attribute learning for fast image/fashion searching and ranking. • Fully-unsupervised image segmentation and learning the underlying lower-dimensional representation for images. • Image reconstruction from sparse contours. • Multi-domain learning and adaptation.	Sept 2016 – Present
Google , Mountain View, CA SWE-PhD Intern at Google Map in the StreetSmart team • Design and implement a deep attribute-based embedding model for traffic sign data and improve the F1 score by around 18%.	May 2018 – Aug 2018
Legendary Applied Analytics , Boston, MA Research Intern • Develop and implement a deep Convolutional Neural Network for spatial-temporal representation learning. • Predict viewer counts and like/dislike ratio prediction for trailer movies.	Sept 2017 – May 2018
Harvard University , Cambridge, MA Research Assistant • Designed and implemented a Recurrent Neural Network (RNN) model for intervention and outcome predictions in ICU. • Simulated multidimensional physiological time series of patients during vasopressor administration. • (M.E. Thesis) Batch Mode Active Learning and Its Application to Astronomy: Developed a batch-mode cost-sensitive active learning approach to optimize astronomical observations for object classification that not only exploited uncertainty and representativeness of the whole unlabeled dataset but also considered the annotation costs.	Feb 2015 – June 2016
Harvard Medical School , Boston, MA Research Fellow in the Laboratory of Systems Pharmacology (LSP) • Developed a new computational method for predicting protein-DNA interactions based on sequences information. • Developed a Protein-DNA Structure-Affinity Database (PDSA) in which the experimental and quantitative DNA binding affinities of helix-turn-helix proteins were mapped onto the crystal structures of the corresponding protein-DNA complexes.	Aug 2013 – June 2016

PUBLICATION

[P.5] Kun He, Fatih Cakir, **Xide Xia**, Brian Kulis, Stan Sclaroff. “FastAP: Deep Metric Learning to Rank.” Under reviewing.

[P.4] Xingchao Peng, Qinxun Bai, **Xide Xia**, Zijun Huang, Kate Saenko, Bo Wang. “Moment Matching for Multi-Source Domain Adaptation.” ArXiv tech report 1812.01754, December 2018.

[P.1] Mohammed AlQuraishi, Shengdong Tang, **Xide Xia**. “An affinity-structure database of helix-turn-helix: DNA complexes with a universal coordinate system.” BMC Bioinformatics, 16(1), 390. PMID:26586237.

HONORS & AWARDS

2016 – Present

- Research Fellowship (2016-Present, Boston University, Boston, MA)
- CRA-Women Graduate Cohort Workshop Student Award 2017
- Dean’s Fellow Scholarship (2016-2017, Boston University, Boston, MA)
- Harvard IACS Student Scholarship (2015-2016, Harvard University, Cambridge, MA)
- SDM Student Award 2016

Before 2016

- Research Fellowship (2013-2016, Harvard Medical School, Cambridge, MA)
- Ren-Min Scholarship (2008-2012, Beijing Institute of Technology, Beijing, China)

TEACHING EXPERIENCE

Boston University

Boston, MA

- CS591 Deep Learning, Fall 2018
- CS131 Combinatoric Structures, Fall 2016

Harvard University

Cambridge, MA

- AM207 Stochastic Methods for Data Analysis, Inference, and Optimization, Spring 2016

TECHNICAL STRENGTHS

Proficient in programming languages: Python, Matlab, C/C++, Java, R.

Proficient in deep learning packages: Tensorflow, PyTorch, MatConvNet, Caffe, Keras.
